

LoopEdge 1.2.2 Release Notes

What's New in this Release?

The following enhancements and bug fixes are included in this software release.

Note that each item includes a reference number, such as [Edge-730], which is used for internal tracking purposes.

- [What's New in this Release?](#)
 - [DeviceHub](#)
 - [Flows](#)
 - [Terminal User Interface \(TUI\)](#)
- [Known Issues](#)

DeviceHub

1. Added the multi-register feature to the Modbus UDP driver. [Edge-933]

Flows

1. Added OS nodes to Flows. This enables collection of CPU system information. [Edge-773]

Terminal User Interface (TUI)

1. Miscellaneous textual updates were made to improve the user experience. [Edge-1065]
2. Improved the workflow for changing a password for first-time logins. [Edge-1070]

Known Issues

- TUI: Setting the time manually does not work even though it is present in TUI menus.
