 - [DeviceHub](#)
 - [Marketplace](#)
- [Known Issues](#)

General Enhancements

1. An installer has been added to the ISO/USB image. [Edge-235]
2. Various usability improvements have been made to the Web UI.

DeviceHub

1. The following drivers are now supported:
 - a. Omron NJ drivers [Edge-927]
 - b. Omron CJ serial driver [Edge-1038]
 - c. Siemens Profibus DP driver [Edge-928]
 - d. Master K80-S serial driver [Edge-937]
 - e. GE Fanuc 90/30 ethernet driver [Edge-1027]
 - f. GE Fanuc CMM serial driver [Edge-1037]
2. PLC-5 controller connect/disconnect issues have been fixed and extended file registers have been added. [Edge-1029]
3. Downloading of a CSV file now ensures that the register descriptions are downloaded. [Edge-961]
4. A backup/restore timeout issue was fixed in this release. [Edge-1069]

Marketplace

1. An issue that caused the LoopEdge controller to have performance issues when using Marketplace has been fixed in this release. [Edge-288]

Known Issues

- TUI: Setting the time manually does not work even though it is present in TUI menus.
